

Join the Neighbourhood Bat Watch

(batwatch.ca)

In summer, colonies of mother bats and their pups live together in trees, bat houses, and other human-made structures. If you have a bat colony on your property, you can become a citizen scientist!

1

Visit batwatch.ca to add your colony (Participate tab)

2

Download the count protocol (Participate tab)

3

Pick a nice night to count bats

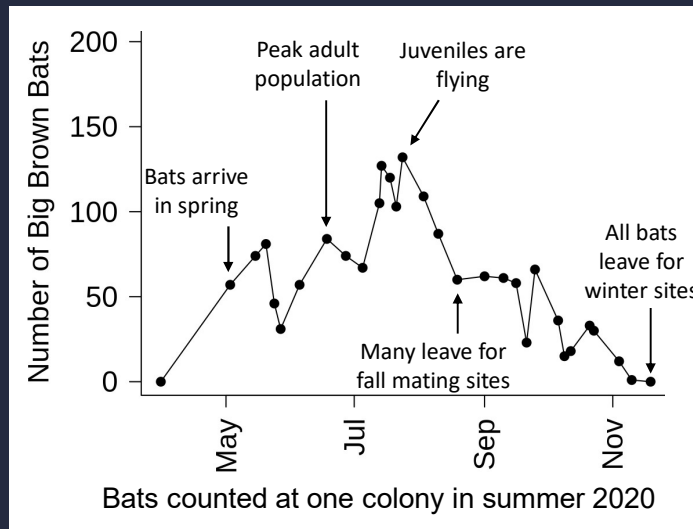

4

Record how many bats exit the colony

5

Upload the count (Participate tab)

We learn so much about bat behaviour from citizen scientist bat counts.
